

Project ECHO: Safer Clean During COVID-19

Safely Cleaning, Disinfecting, and Sanitizing the Home in the Time of COVID-19

The Southwest Center for Pediatric Environmental Health (SWCPEH) and the Texas Tech University Health Sciences Center El Paso (TTUHSC El Paso) Department of Emergency Medicine are deploying a Project ECHO® telehealth model to create a community collaboration effort focused on promoting awareness about COVID-19 and exposure risks from cleaning, disinfecting, and sanitizing agents.

Our goal is to protect children in the home from chemical exposure deriving from household cleaning products while effectively protecting against the spread of the

What is Project ECHO®?

Project ECHO® (Extension for Community Healthcare Outcomes) is a free, innovative telehealth/education outreach model that connects community providers and leaders to a multidisciplinary team of specialists in pediatric health and toxicology.

This ECHO is tailored to those working in community health, such as promotores de salud, community health workers, health education specialists, and public health educators. **However, all are welcome to attend.**

The six-session ECHO® virtual tele-education modules will take place biweekly, **Wednesdays at 12:00 P.M. Mountain Standard Time, July 7 – Sept. 22, 2021.**

REVISED Session Schedule — Please register to join
