

Healthy Homes Workshop

The Southwest Center for Pediatric Environmental Health (SWCPEH), Texas Tech University Health Sciences Center El Paso (TTUHSC El Paso) Department of Emergency Medicine, and the West Texas Regional Poison Center (WTRPC) are proud to sponsor a one-day Healthy Homes workshop in Jonesboro, AR. This training will lead participants to understand the connection between housing and health and how to take a holistic approach to identify and resolve problems that threaten the health and well-being of residents, especially children. The curriculum identifies root causes of health problems, such as asthma, influenced by the indoor environment. The workshop focuses on the eight “Keep It” principles of a healthy home: clean, dry, pest-free, contaminant-free, safe, ventilated, comfortable, and maintained.
